

INSTITUTE OF TECHNOLOGY
UNIVERSITY OF MORATUWA

NATIONAL DIPLOMA IN TECHNOLOGY PROGRAMME

STUDENT HANDBOOK 2023

ITUM VISION

To be a centre of excellence in Technological Education.

ITUM MISSION

To be a dynamic technological institute in the region and actively contribute to the educational, economic and social advancement of Sri Lankan community by:

- ❖ Providing accessible, flexible and efficient technological education and skills training to meet the needs of society and the industry.
- ❖ Providing an environment for innovation and creativity.
- ❖ Formulating an active collaboration with the industry, business and the community for career opportunities.
- ❖ Enhancing social and economic pathways and opportunities for young people.

FOREWORD

Welcome to the Institute of Technology, University of Moratuwa (ITUM).

This booklet will provide information pertaining to the academic courses of the National Diploma in Technology programme, and the functions and activities of the two main administrative branches of the ITUM, namely, the Administrative Divisions and the Finance Divisions.

The information contained in the booklet were obtained from the Heads of all Divisions of ITUM and therefore it is up to date. Every effort will be made to keep the students informed of any change made from time to time.

We sincerely hope that every student will make maximum use of the information provided, to reap the benefits of the course and pursue higher studies to enhance his/her future prospects.

A word of appreciation is extended to the Director, Heads of all Academic and Administrative Divisions and Training engineer of ITUM for the information provided in order to make this publication a worthwhile exercise.

The committee wishes to note the support of Mr. I. Uduwara to compile this book.

ITUM Student Hand Book Committee

A BRIEF HISTORY OF THE ITUM

The Institute of Technology was established on 10th March 2000 by the Honourable Minister of Education and Higher Education primarily to conduct NDT and other similar level courses at the University of Moratuwa. But the history of the NDT programme dates back to the period of Ceylon Technical College Maradana established in 1893. The origin of the NDT programme had been at Maradana Technical College, as the Junior Technical Offices (JTO) course. The J.T.O course was later transferred to the Institute of Practical Technology (IPT) at Katubedda, when this institute was formed in 1960, with aid from the Government of Canada on a fifty acre block of land over-looking the Bolgoda Lake.

The primary aim of the IPT was to provide full time courses for architects, junior technical officers, surveyors & levellers and draughtsmen. This Institute also offered part time courses in engineering studies for those employed in the government and private sectors, and also prepared students for foreign professional examinations of the Institution of Engineers, UK and the Royal Institute of British Architects. The courses in architecture however, were later transferred to the University of Ceylon, Colombo when it established its own Department of Architecture.

The Institute of Practical Technology witnessed its first change of status, six years after its inception. The Government of Ceylon found that an effective system of specialized education and training capable of supplying the country with the necessary scientific and technical personnel was a prerequisite to achieve and sustain rapid development. It therefore appointed a 'Commission of Inquiry on Technical Education in 1961. As engineering education at a higher level was provided exclusively by the Faculty of Engineering of the University of Ceylon, Peradeniya, this Commission in its report of 1963, recommended the enhancement of facilities to professional engineering education. It was therefore decided to establish the Ceylon College of Technology at Katubedda, utilising the

resources of the Institute of Practical Technology. Assistance for this project was provided by the United Nations Development Programme through UNESCO. The Ceylon College of Technology was thus begun with its new courses on a professional level in 1966. The Institute of Practical Technology continued in the same premises with its full-time courses, but was amalgamated with the Ceylon College of Technology. The year 1967 witnessed the introduction of the NDT programme that succeeded the JTO courses of study. The engineering degree and technician programme of the Ceylon College of Technology were designed to have an industrial bias with the inclusion of a compulsory period of in-plant training so that the College would produce an engineer or technician with practical training as an integral part of his study. Within the next six years of its existence, the Ceylon College of Technology earned University status.

Under the provisions of the University Act No 01 of 1972, the University of Ceylon was established on the 15th of February 1972, incorporating all the existing universities and the Ceylon College of Technology as campuses of a single university. The Ceylon College of Technology thus became the Katubedda Campus of the University of Ceylon. The Department of Architecture from the then University of Ceylon, Colombo campus and the Technical Teacher and Instructor Training Institute at Ratmalana established with aid from the International Labour Organization were transferred to this newly formed Katubedda campus. It began with just one faculty, that of Engineering and Architecture. The first President of the Campus was Dr. L. H. Sumanadasa who steered the progress of the Institution from its inception as Principal of the Institute of Practical Technology, and then as the Director, Ceylon College of Technology. Later he was appointed as the Vice – Chancellor of the University of Ceylon.

When Ceylon subsequently became a Republic in 1972, the corporate name of the single university was changed to University of Sri Lanka. In the meantime, the departments of study at the Katubadda Campus were expanded and new courses of study at technician, undergraduate and post graduate levels were introduced. The School of Applied Science was established in 1974. The Sub-department of Rubber Technology now titled Polymer Technology was established in 1976. The Department of Town and Country Planning and the Sub-departments of Textile Technology and Marine Engineering were established later.

Further changes in the corporate structure and composition were affected by the Universities Act No.16 of 1978. Under the provisions of section 139(1) of this Act, the Katubedda Campus of the University of Sri Lanka acquired the status of an independent University with its present corporate name 'University of Moratuwa, Sri Lanka, with three faculties of study viz, the Faculty of Engineering, the Faculty of Architecture and Town & Country Planning and the Faculty of Physical and Applied Science. Later the Faculty of Physical and Applied Science was amalgamated with the Faculty of Engineering. In August 1983, the Technical Teacher unit was transferred to the Ministry of Higher Education to function as an independent institution within its own premises. The NDT program continued to be conducted under the Faculty of Engineering. The director Technicians Studies functioned under the Dean of Engineering. The year 1986 was an important year for NDT students. This was the year in which the conducting and evaluation of the NDT programme was taken over by the University from Ministry of Higher Education. The intake for NDT course was 350 at that time. Further, in 1986 a new NDT course was inaugurated in Nautical Science and Technology. The NDT curricula were vastly improved in 1995. (History and Development National Diploma in Technology, Eng. J.K. Lankathilake)

Next few years, three faculties of the University of Moratuwa and the NDT programme functioned within the same highly congested original premises, sharing all the facilities as well as all the associated difficulties as such type of arrangements usually entail. As the University gradually developed qualitatively as well as quantitatively, sharing facilities started creating unwanted pressure situations, hampering the development of all entities.

The Institute of Technology of the University of Moratuwa (ITUM) was established in the year 2000 to administer mainly the National Diploma in Technology programme, under a separate institutional set-up directly attached to the main university, utilizing an established practice in the Sri Lankan university system.

From the beginning of its existence, the ITUM was destined to find new home premises of its own, So that it could embark on the much needed multi-faceted development it deserves.

The Relocation & Development Project of the ITUM started at Diyagama, Homagama, about 15 km away from University of Moratuwa become the welcome answer to this long term need. This major project, was said to be the biggest investment by the state to a higher educational institute in the recent past. It has impressive state-of-the-art building complex comprising of all the traditional facilities such as lecture theatres, laboratories, hostels etc. as well as some novel features such as a huge multifunctional theatre hall and a supermarket complex. The project also led to the much needed increase in student numbers intake. As a result, the hostels provided within the campus have ample rooms to accommodate all the students of the institute. All the necessary brand new machinery, equipment and furniture were supplied and installed as one of the goals of the project. In addition, all the academic, the administrative and the non-academic staff currently attached to the institute, were offered several local as well as abroad training under the project, enhancing their capabilities further to facilitate the eventual upgrading of the quality of the national service they provide.

The Relocation & Development project of the ITUM, happened on a very fast tract compared to the normal Sri Lankan standards of such activities. The grand institutional premises were completed and ceremonially opened in the year 2017 and dedicated to the people of Sri Lanka, particularly to the younger generation, who will be the direct beneficiaries of this remarkable national effort.

It is expected that this relocation and development will lead the ITUM to become a center of excellence among similar intuitions not only within mother Lanka, but also within the regional global setting too.

INTRODUCTION TO THE COURSE

We are pleased to admit you to the course leading to the National Diploma in Technology, of the Institute of Technology, University of Moratuwa (ITUM).

The primary aim of the course is to produce middle- level technical personnel required by the industry of our country in various disciplines. We conduct the NDT programme in ten disciplines with a total intake of 800. The breakdown is as follows:

Chemical Engineering Technology	50
Civil Engineering Technology	200
Electrical Engineering Technology	100
Electronic and Telecommunication Engineering Technology	100
Marine Engineering Technology	20
Mechanical Engineering Technology	100
Nautical Studies and Technology	20
Polymer Technology	50
Textile and Clothing Technology	60
Information Technology	100
for Armed Forces & University non-academic staff	05

A fully fledged diplomate is initially expected to function as the link between the professional Engineer or Manager and the workforce at the field/shop level. This role requires a diplomate to develop professionally and improve his communication and managerial skills. He/She needs to educate himself/herself in the chosen study field of study so that he/she would be able to appreciate the innovations/designs by the professional engineer and would be able to communicate with the subordinates and make an innovation/design a reality.

Thus the course consists of a two- year academic study period and one year industrial training. The first year subjects are designed mainly to equalize, consolidate and improve the student's knowledge in basic sciences and to introduce the specialized discipline of study to which he/she has been selected. It will also give exposure to some basic skills required in engineering practice (e.g. Workshop Technology, Engineering Drawing). Each discipline offers one or more field subject/s of the student's chosen field of study. (e.g.) Civil Engineering Department offers Building Construction for the Civil Engineering stream)

English Language is a compulsory subject in the first year due to the following reasons:

- i. Communication plays an important role in a diplomate's career. Therefore students are required to develop their skills in comprehension, speech and report- writing.
- ii. The NDT course is conducted entirely in the English medium. Since most of the students have done their studies in Sinhala or Tamil medium up to the GCE (A/L), their levels of proficiency in the English language vary widely and there is always room for improvement.

The second year subjects mainly include the application of various engineering phenomena in the selected field of study.

The third year has been allocated for obtaining the required hands-on experience in the industry. Training at the accepted industrial establishments is organized and monitored by the National Apprenticeship and Industrial training Authority (NAITA) and the Lecturer in charge of Industrial Training at the ITUM.

At the end of the three years of education and training, the successful students are awarded the National Diploma in Technology with a grade point average value (GPA), as per the performance criteria approved by the University.

The new academic semester curriculum now in operation at the ITUM was introduced in the year 2018 for the first year students of that year. The purpose was to broaden the outlook of students and instil in them a sense of confidence and responsibility in their selected fields of study, while keeping abreast of current technological advances in the industrial world.

PAST DIRECTORS

Prof. (Mrs.) I. J. Dayawansa (*Acting*)

Jul. 2000 – Nov. 2000

Dip. Ing. N. L. Wanigathunga

Nov. 2000 – Jul. 2001

Dr. T. A. Piyasiri

Aug. 2001 – Dec. 2003

Dr. M. A. R. V. Fernando (*Acting*)

Jan. 2004 – Mar. 2004

Prof. D. C. H. Senarath (*Acting*)

Apr. 2004 – Sep. 2004

Prof. K. K. C. K. Perera

Sep. 2004 – Sep. 2007

Dr. T. A. G. Gunasekara

Sep. 2007 – Sep. 2013

Mrs. M. M. P. D. Samarasekera

Sep. 2013 – May. 2019

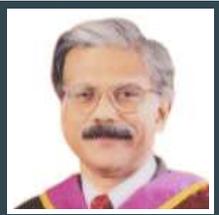

Major General (Retired) S. K. Thirunavukarasu

May. 2019 – Jan. 2020

Dr. Sunil Jayantha Nawarathne

Jan. 2020 – July 2020

Prof. S. M. A. Nanayakkara

July.2020 – Oct. 2020

Dr. C. S. Lewangamage

Oct.2020 – Feb. 2021

Director -ITUM

Major General (Retired) S. K. Thirunavukarasu RSP VSV USP

THE BOARD OF MANAGEMENT

1. Major General(Retired) S. K. Thirunavukarasu RSP VSV USP

Director
Institute of Technology, University of Moratuwa

2. Ms. K. T. S. Wijesiriwardhana

Nominee of the Secretary to the
Ministry of the Minister in charge of the subject of Higher Education

3. Mr. A.W. Seneviratne

Nominee of the Secretary to the
Ministry of the Minister in charge of the subject shipping

4. Dr. W.M.S. Wijesinghe

Nominee of the Chairman of the
National Apprentice and Industrial Training Authority (NAITA)

5. Prof. K. T. M. U. Hemapala

Dean,
Faculty of Engineering, University of Moratuwa

6. Prof. (Mrs.) Y. G. Sandanayaka

Dean,
Faculty of Architecture, University of Moratuwa

7. Prof. Rohan Samarajiwa

Council Nominee

8. Prof. A.S. Karunananda

Senate Nominee

9. Dr. Priyantha Premakumara

Nominees of the University Grants Commission (UGC)

10. Dr. Charith Jayathilake

Nominees of the University Grants Commission (UGC)

11. Mrs. N.K. Abeyrathne Dias

Nominees of the University Grants Commission (UGC)

12. Mr. G. G. Jayarathne

Nominees Board of Studies/ITUM

13. Dr. (Mrs.) M.C.W. Somarathne

Nominees Board of Studies/ITUM

14. Mr. N.D. Kuruppuarachchi

Secretary

ADMINISTRATION DIVISIONS

Deputy Registrar

Mr. N. D. Kuruppuarachchi

BSc (Natural Sc.) (OUSL), PGDMM (IGNOU, India),
MSc (Sri Jayewardanepura), MBA (IGNOU, India)

Assistant Registrars

Division of General Administration

Mrs. L. P. Perera

BA (Social Sc.) (OUSL)

Division of Academic and Student Affairs

Ms. K. H. W. Malepathirana

BSc (Business Mgt.) (Sp.) (NSBM),
MSc (Sri Jayewardanepura)

Division of Examinations

Ms. R. M. H. A. Lakmali

BA (Econ) (Colombo)

The Institute of Technology was established in the year 2000 by Ordinance No 3 of 2000 under section 24 A of the Universities Act No. 16 of 1978 to conduct primarily the National Diploma in Technology Course. More than twenty batches of students were admitted to the Institute since then and a new batch of students has been enrolled for the year 2022 with the intention of making a significant contribution towards national development in the years to come.

Authorities of the Institute

- **The Board of Management**
- **The Board of Studies**
- **Board of Residence and Discipline**
- **The Divisional Committees**

The Board of Management is the academic and executive body of the Institute, the Board of Studies has the control and general direction of instructions, education research and examinations of the Institute. Board of Residence and Discipline deals with the matters pertaining to condition of residence and discipline. The Institute has the following five Divisions at the moment.

- **Division of Civil Engineering Technology**
- **Division of Electrical, Electronics and Telecommunication Engineering Technology**
- **Division of Mechanical Engineering Technology**
- **Division of Maritime Studies**
- **Division of Information Technology**
- **Division of Interdisciplinary Studies**
- **Division of Polymer and Chemical Engineering Technology**
- **Division of Textile and Clothing Technology**

Each Division has a Divisional committee to present recommendations on matters connected with the courses of study in respect of its speciality to the Board of Studies.

The ITUM has two main administrative branches. They are General Administration branch and Financial Administration branch. The General Administration Branch consists of Divisions of Human Resources, Academic and Student Affairs, General Administration and Examinations.

Division of Human Resources

Division of Human resources mainly handles the activities related to staff of the Institute. Accordingly, it facilitates providing human resources for academic teaching and academic supporting purposes. The Division manages recruitments, retirements & resignations, promotions and confirmations. It also completes various tasks related to the payment of annual salary increments and other regulatory work.

The Division is located at the seventh floor (U7) of the main administration building.

Division of General Administration

Division of General Administration provides all kinds of supportive work for the smooth functioning of the Institute. Administration of supportive work such as electricity, water, security, cleaning, transportation, welfare activities, managing of other infrastructure facilities and relevant routine work are done by the General Administration Division.

The Division is located at the fourth floor (U4) of the main Administration Building.

Division of Academic and Student Affairs

Division of Academic and Student Affairs handles admission, selection and registration of students, welfare activities of the students and other administrative functions related to the students. The Division is located at the third floor (U3) of the main Administration Building.

Services extended to the students:

Mahapola Scholarship Award

Under this scheme, payment will be made in 10 instalments per Academic year to the selected students. Students will be selected based on the annual parental income and the merit obtained at the G.C.E Advanced level.

Bursary

Under this scheme, payment will be made in 10 installments per Academic year to the selected students. students will be selected based on the annual parental income.

Bus/Train season tickets will be issued to relevant students on request.

Hostel facilities will be available for students following the 1st and 2nd years of the programme.

Division of Examinations

The Division of Examinations is responsible for all the examination related matters and various student related services such as;

- Managing all examination process in accordance to the Institute's rules and regulations
- Compilation and declaration of results and maintaining the records
- Issuing Result Sheets, Academic Transcripts and Diploma Certificates
- Conducting the Diploma Awarding Ceremony
- Verification of Certificates on request
- Issuing Course Completion Letters

The Division is located at the sixth floor (U6) of the main Administration Building

DIVISION OF FINANCE

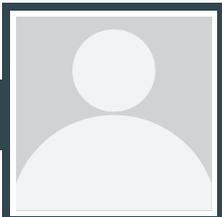

Senior Assistant Bursar (*Accounts, Salaries & Loan Section*)

Mrs. S. P. D. Peiris

BCom (Sp.) (Kelaniya), PGDIP (Pub. Mgt.) (SLIDA), MPM (SLIDA), CBA, APFASL

Assistant Bursars

Payments

Mrs. A. Liyanagamage

BCom (Sri Jayewardanepura), LICA

Supplies

Mrs. P.J. Weerakkodiarachchi

BSc (MA) (Sri Jayewardanepura), MBS (Colombo), CBA, MAAT

The Finance Division of the Institute of Technology, University of Moratuwa (ITUM) is responsible for carrying out the following activities that can be broadly classified under financial management activities, under the guidance of the Board of Management of the Institute and in compliance with the government financial rules and regulations.

- Establishing financial objectives
- Planning
- Budgeting
- Setting financial targets
- Ensuring
 - proper financial control systems
 - proper management information systems
 - good internal control for financial matters

- Monitoring, reviewing and performing corrective actions
- Preparing monthly progress Reports and annual accounts

The Senior Assistant Bursar and two Assistant Bursars are assisted by a staff consisting of a Management Assistant (Book Keeping), Management Assistant (Storekeeping), Management Assistant (Shroff), two other Management Assistant and two Works Aids to ensure proper administering of funds and maintaining proper books of accounts under the Institute Ordinance and guidance of the Director and compliance with relevant rules and Regulations imposed by UGC.

Within the broader financial management activities of the Finance Division some of the specific functions carried out by the Division listed below can be considered as useful for all the students.

- All payments to the students which includes Payment of Bursary and Mahapola.
- Receiving of payments by the students which include Registration, Hostel Fees, Library Fines, Certificate Fees, Application Fees and Award ceremony Fees and etc.

It is important for all the students to be mindful that the ITUM spends approximately Rs. 297,850/= per year for each student according to the year 2017 records. Funds for the ITUM are provided by the General Treasury and these are all public funds. As such, it is the duty of the Senior Assistant Bursar and Assistant Bursars to ensure equity and accountability to all stakeholders of public funds while providing the best service to the students at the ITUM in an effective and efficient manner.

Civil Engineering Technology

The NDT Programme in Civil Engineering Technology is conducted by the Division of Civil Engineering Technology with the objective of producing qualified professionals for the civil engineering industry. It consists of academic activities at the ITUM in the first and the second years within 4 semesters. The third year consist of two semesters in industrial training. The annual student intake to the Civil Engineering Technology discipline is 200.

The civil engineering industry is about construction and maintenance of buildings, bridges, roads, railways, dams, reservoirs, water supply and waste disposal schemes, major and minor irrigation schemes, tunnels, power houses, runways, airports, harbours and coastal structures etc.

The first year study programme is mainly focused on the theoretical subjects where the students are expected to gain a thorough knowledge in the fundamental principles of engineering. The students are also exposed to the basics of building construction technology in the first and second semesters of the first year.

The semester 3 and 4 study programmes in the second year aim at giving a broad based knowledge in different applications of the civil engineering industry such as Construction Technology, Environment Engineering, Water Resources Engineering and Highway Construction and Maintenance. The principles, theory, design and applications of the above major civil engineering sectors are encompassed in the curriculum. The core modules such as Advanced Mathematics, Structural Mechanics, Theory and Design of Structural Elements, Hydraulics and Hydrology, and Soil Mechanics and Geology are included to give the desired theoretical background.

The students are exposed to a thorough knowledge of engineering surveying and levelling throughout third and fourth semesters including a two weeks residential camp in the curriculum to give the essential skills and competencies in surveying required by the civil engineering diploma holders. Further soft skills are developed through modules in enhancing English language skills, communications and ethics. The students are provided sufficient opportunities to develop their writing and presenting abilities through a number of modules.

Sufficient knowledge in Quantity Surveying, Engineering Economics and Accounting and management in civil engineering are provided at the third and fourth semesters to prepare the students for the first level management roles they are expected to be employed within the first few years of their careers after passing out.

The culmination of the learning is showcased through two modules allocated for group projects each during the semesters 3 and 4.

COURSE CURRICULUM

Semester 1 (15 weeks)

Module Code	Module Name	Credits
CH1102	Properties of Materials	3
CI1101	Building Technology I	3
CI1102	Strength of Materials	3
IS1101	Aesthetic Studies	2
IS1103	English Language Skills Enhancement I	2
IS1104	Mathematics and Statistics	3

Electrical, Electronics & Telecommunication Engineering Technology

This division encompasses NDT studies related to two fields namely,

- 1. Electrical Engineering Technology**
- 2. Electronics & Telecommunication Engineering Technology**

The NDT courses of Electrical Engineering Technology and Electronics & Telecommunication Engineering Technology are 3-year diplomas geared to meet the needs of the industry and thus the passed out diplomats will have to play an important role in forming a link between the Engineers and the rest of the workforce in the industry.

It has its academic activities at the ITUM during the first two years as four semesters. The third year is the 5th and 6th semesters during which the students are exposed for an industrial training. The annual student intake to the Division is 200; 100 number of students for each academic field.

Electrical Engineering Technology is mainly about construction, installation, maintenance and control of power systems, motors, drives, related equipment etc.; Electronics & Telecommunication Engineering Technology is mainly about construction, maintenance and control of electronic systems and devices, telecommunication systems, related equipment etc.

The first year study programme is mainly focused on the theoretical subjects where the students are expected to gain a thorough knowledge in the fundamental principles of engineering. The students are also facilitated to study the basics of the fields of electrical and electronic engineering technology during these two semesters. During the 3rd semester the program is targeted for the students to become more aware of the field related knowledge/ applications while the 4th semester is to facilitate them to be more conversant on the field related applications.

The culmination of the learning is showcased through two modules allocated for group projects each during the semesters 3 and 4.

In Addition to the core subjects the Division offers modules for various other fields such as Applied Sciences, Electro-Technology, Applied Electricity and Electro-Technology. As per the revised curriculum, the modules offered to students for all 4 semesters in the two fields are in the sections below.

Electrical Engineering Technology

COURSE CURRICULUM

Semester 1 (15 weeks)

Module Code	Module Name	Credits
CH1102	Properties of Materials	3

Well qualified academic staff members serving to the Division and academic program teach through four semesters. Mechanical division offers common modules during semester one and semester two for all disciplines, including, Workshop Technology I & II, Engineering Drawing I & II, Engineering Mechanics, and Applied Thermodynamics. Field relevant modules are offered at semester three and four, which help students to investigate depth in Mechanical Engineering. Some of emerging technologies in Manufacturing such as, Automation & Mechatronics, Energy Technology, CAD/CAM systems, Production and Operations Management, Automotive Technology etc will be delivered through modules in second year of studies.

Division has state-of-the-art labs and workshop facilities to build the necessary skill and knowledge to students. All facilities at the Division is divided into four main sub-groups, such as Manufacturing & Production, Energy & Environment, Automation & Control and Automobile. Each group has set of laboratories and workshops to deliver the content of Mechanical Engineering Technology from semester one to semester four.

After completion of four semesters of academic work in the first and second years in the institute, students undergo in-plant training in their third year of study, which covers semester five and semester six. Total time for in-plant training is nearly one year and students get an opportunity to train in well-established industries serving both local and foreign customers.

This Division has a total of 39 permanent staff and provides their services to build an outstanding diplomate in Mechanical Engineering Technology.

After completion of NDT in Mechanical Engineering Technology, students can obtain higher qualifications through following courses conducted by the Institution of Engineers, Sri Lanka (IESL), Open University OUSL, Institution of Incorporated Engineers, Sri Lanka (IIESL) etc.

Division of Maritime Studies

Maritime Division is small enough to be friendly but large enough to offer a comprehensive range of programs. High academic standards are supported by the services, students need to meet these standards.

Division of Maritime Studies established in 1978, under the Department of Mechanical Engineering, in internationally recognized prestigious University, University of Moratuwa, which was originated in 1972 by the University Act No.1 of 1972 under the Ministry of Higher Education. At its inception, section of Maritime Studies conducted the National Diploma in Technology in Marine Engineering Course (Watch keeping Engineer) and then extended the facilities in 1987 to commence National Diploma in Technology in Nautical Studies (Officer in Navigational Watch) course under the auspices of United Nation Development Programme and the Ministry of Ports and Shipping and Rehabilitation. The Section of Maritime Studies has recognized as a separate Division as per the letter no. UGC/AC/Other/ITUM issued by University Grants Commission with effect from 20th February 2019.

The Division of Maritime Studies conducts two National Diploma in Technology officer level Courses, namely;

Marine Engineering Technology

with annual intake of 20 number of cadets per year and

Nautical Studies

with annual intake of 20 number of cadets per year.

Since diplomates giving their service at on-board ships, International rules and regulations governed by International Maritime Organization (IMO) has been implemented. in the program.

Academic Programme

	Sem. 01	Sem. 02	Sem. 03	Sem. 04	Sem. 05	Sem. 06
Marine	Academic	Academic	Academic	Academic	Inplant training	
Nautical	Academic	Academic	Onboard ship training		Academic	Academic

Sea training to the Nautical Studies students is provided by the Ceylon Shipping Corporation and other shipping agencies while inplant training for marine engineering students are offered by Colombo Dockyard Pvt Ltd, Sri Lanka ports authority and numerous Power plants in the country. The process of inplant training is monitored and assessed by National Apprentice and Industrial Training Authority (NAITA). The division encourages female students also to follow the Nautical Studies Course.

All the cadets must obtain a valid CDC (Continuous Discharge Certificate) issued by Shipping Ministry of Srilanka after following valid Mandatory Short Courses on Elementary First Aid, Personal Survival Techniques, Fire Prevention and Fire Fighting, Personal Safety and Social Responsibilities and Maritime English Course.

Merchant Shipping Secretariat (MSS) at Ministry of Ports and Shipping annually conducts quality audits to verify the standards of courses offered by the Division of Maritime Studies.

Quality Policy statement in English is displayed at important places in the Division and need to be visible to all employees, students and other visitors to the Division.

Polymer Technology

Polymer Technology course includes a study of the scientific technological aspects of polymeric materials, and their usage in manufacturing of polymer based products, characterization and testing of polymer materials and products. Polymers include a wide variety of materials. This program mainly concerns technology of plastics, rubbers, fibres, surface coatings and adhesives, which provides all round knowledge and skills to compete in polymer industry.

The fast growing polymer industry in the world enhances the demand in local and overseas for employees with sound academic and professional knowledge on polymer technology.

Chemical Engineering Technology

Chemical Engineering Technology is concerned with industrial processes in which raw materials are converted into useful products. The ultimate goal of this course is to provide the required competencies for the diplomats to serve any industry dealing with chemical and process Engineering technologies. This is the only Diploma level course in Chemical Engineering Technology in Sri Lanka.

Chemical Engineering Technology diplomats will be mostly engaged in broadly defined designs, operation, control, maintenance and optimization of processes in industries such as petroleum, food processing, pharmaceuticals, water and wastewater treatment, production of chemicals, soap, detergents, fertilizer, polymer, ceramic, paper and etc. Thus, they have the opportunity of employ in wide spectrum of local as well as international industries.

Textile and Clothing Technology

Textile and Clothing Technology study programme provides an excellent all round education and preparation for employment in Textile and Clothing and related fields. This course includes modules such as Fiber Science, Yarn and Fabric Manufacturing, Textile Testing processes, Pattern Development, Industrial Engineering and Clothing Production Technologies.

To enhance the students' knowledge while reducing the gap between industry and the academic programmes several measures are being carried out such as visiting factories, carrying out industrial projects and conducting workshops by eminent personnel in the industry. After two years of academic study programme, students get industrial experience during the third year in their one-year training programme.

Our diploma holders typically go into a wide variety of jobs in the Textile and Clothing industry locally and overseas.

General Overview

The Division of Interdisciplinary Studies was formed with the establishment of the Institute of Technology of the University of Moratuwa in October 2000. The academic staff of the Division is composed of experienced and qualified lecturers including senior staff members who had been serving in the Faculty of Engineering of the University of Moratuwa prior to the establishment of the Institute. The Division conducted courses in English, Mathematics and Information Technology up to 2018. In 2018, two new subject streams - Aesthetic Studies and Sports Studies were introduced. Currently, the Division offers English, Mathematics and Statistics, Aesthetic Studies and Sports Studies modules.

Modules Offered by the Division

Semester	Code	Module Name	Credits
1,2	IS1101	Aesthetic Studies	2
1	IS1103	English Language Skills Enhancement I	2
1	IS1104	Mathematics and Statistics	3
2	IS1203	English Language Skills Enhancement II	2
2	IS1204	Mathematical Methods with Engineering Applications	3
1,2	IS1205	Sports Studies	2
3	IS2301	Advanced Mathematics and Statistics	2
3	IS2302	Communication Skills	2
3	IS2303	Computational Mathematics and Advanced Statistics	3
4	IS2401	Communication Skills and Technical Writing	2
4	IS2402	Industrial Statistics and Modelling Computations	3

1. Mathematics and Statistics

Mathematics and statistics modules conducted by the Division focus on teaching the basic concepts of Mathematics and Statistics, the development of rational thinking in formulating and solving engineering and technical problems and the application of mathematical and statistical knowledge in solving broadly defined real world problems. In addition to that, students gain hands-on experience in using Mathematical and Statistical packages such as MATLAB, MINITAB and EXCEL during the course.

2. English Language Teaching Unit

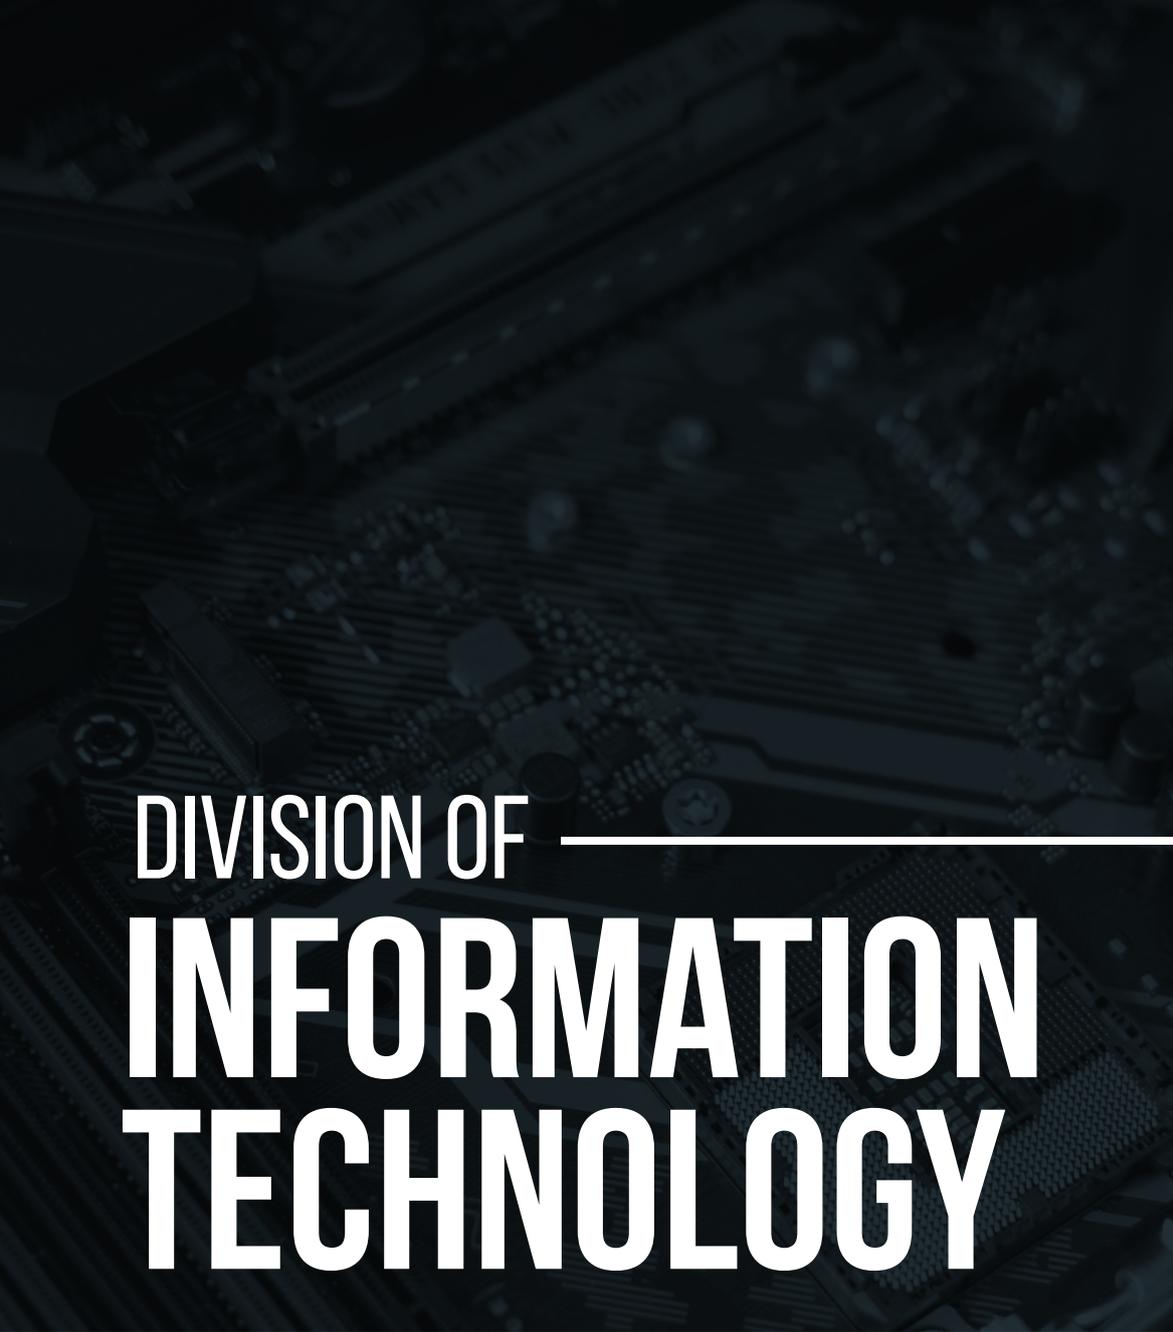

The English Language Teaching Unit (ELTU) is a newly created academic entity functioning under the Division of Interdisciplinary Studies. The English language courses offered by the ELTU are designed to improve the English language proficiency of students who enroll to follow the National Diploma in Technology programme. A pre-academic English course is conducted for all newly admitted students prior to the commencement of the academic programme with the intention of helping students to switch over from their mother tongue to English as the medium of instruction. Thereafter all students (except nautical and marine) follow the compulsory course modules, English Language Skills Enhancement 1 and 2 (IS 1103 & IS 1203) three hours per week throughout the first year of their studies. The modules, Communication Skills (IS 2302) is offered for textile, chemical and polymer students in semester 3 and Communication Skills and Technical Writing (IS 2401) for IT students in semester 4. The course components aim at producing engineering diploma holders with strong communication skills who will be able to function effectively in diverse work environments.

3. Sports Studies

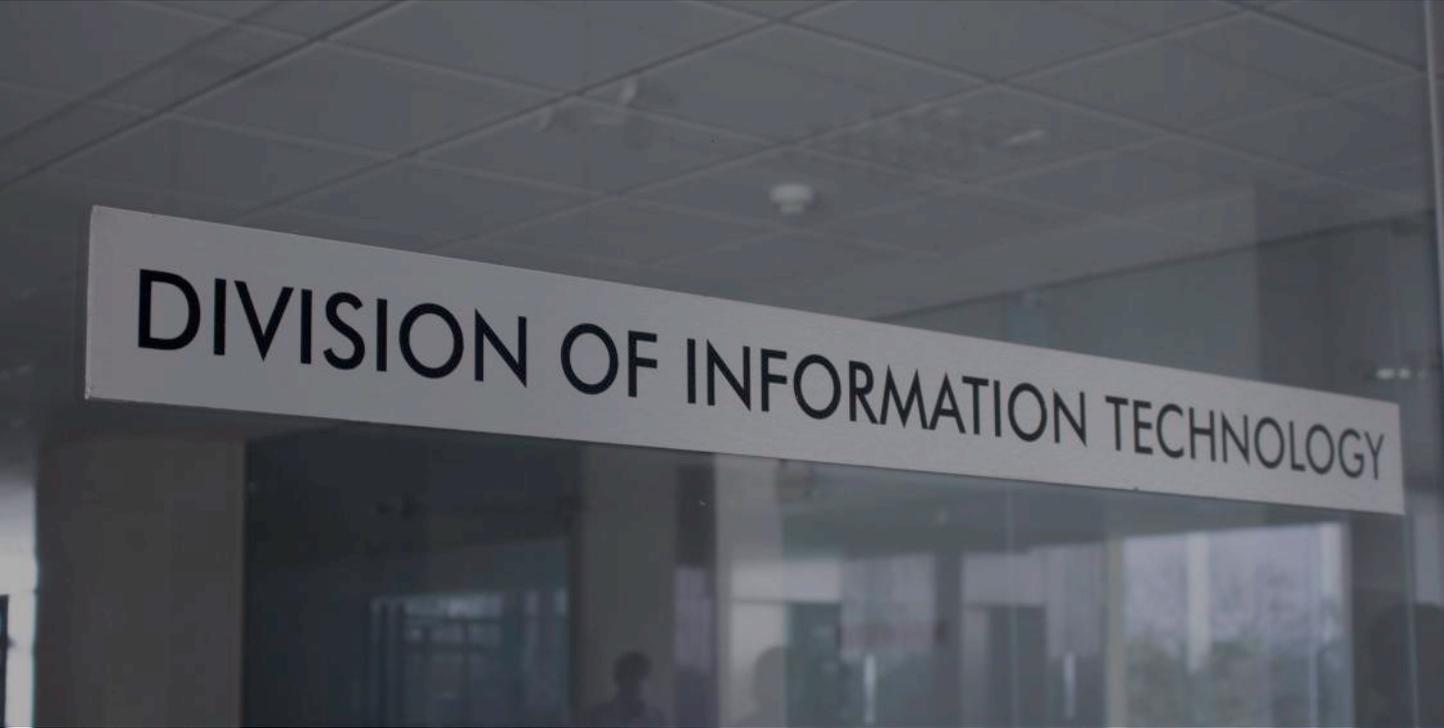

The Sports Studies module aims at developing personality, leadership and teamwork and appreciation of sports of engineering technology students. It also enhances communication skills, the ability to think reflectively and reflexively in solving problems. The module contains the basic concepts and value of sports, physical fitness and health, the basics of first aid techniques, injury prevention methods, sports leadership, and management. Practical sessions include aerobics and yoga sessions and different sports such as volleyball, cricket, netball, athletics, football, and badminton.

4. Aesthetic Studies

Aesthetic Studies was introduced to the ITUM curriculum in 2018 to develop creative and critical thinking as well as aesthetical capabilities of its students. The objective is to provide a well-balanced education that would augment students' personal and professional life leading to develop socially better fitting personalities. This module contains a theoretical as well as a practical component. For the practical component, students should choose one subject out of four – Dance, Drama, Music or Visual Art.

The NDT programme in Information Technology is

The NDT programme in Information Technology is designed to equip students with state-of-the-art expertise in Information Technology. This program encompasses a thorough grounding in the fundamental skills necessary as well as providing a theoretical understanding which is vital for an IT diplomate. They are also taught communication and personal skills in order to enable them to interact effectively in a demanding work environment. The programme consists of academic activities at the ITUM in the first four academic semesters and Industrial Training in the last two semesters.

INDUSTRIAL TRAINING DIVISION

**Head of Industrial Training, Career Guidance,
and Post Diploma Education Center**

Dr. (Mrs.) Chandani Somaratne

BSc. MSc. PhD

A Center for Industrial Training, Career Guidance, and Post Diploma Education has been established at the Institute of Technology University of Moratuwa for the smooth and effective functioning of the following areas.

- Industrial training is one essential component of NDT program. All the activities related to industrial training are steered under the purview of this center.
- Students need a guide to explore and plan their future career endeavors based on their individual interests, skills, and values. Career guidance activities are planned and implemented by this center.
- The opportunities available for Post Diploma Education are explored and coordinated with the NDT diplomates and the institutions/universities.

Training Engineer

Eng. Kamalnath Jinadasa

NDT, MSc [Moratuwa], AMIE[SL], MPRI[SL], FIE[SL]

In the National Diploma in Technology program, the third year is set apart for Industrial Training. The period of Industrial Training is the bridge between academic studies at the University and professional competence as a diplomate. A student successful at the first- and second-year examinations and successful in completing the industrial training assignments and assessments become a fully qualified diplomate.

Industrial Training, Career Guidance, and Post Diploma Education Center is presently located on the 3rd floor in room number U 3220, in the main Administration Building. The Industrial Training Engineer coordinates with the National Apprentice and Industrial Training Authority (NAITA) in organizing Industrial Training for National Diploma in Technology (NDT) students in recognized organizations in Sri Lanka. In the selection of students for training organizations, their academic performance at the examinations is taken into consideration.

During Industrial Training, students are expected to maintain a Daily Diary, submit Training Reports periodically and present themselves in face-to-face Interviews. Officers from NAITA, and Academic and Training staff from ITUM will conduct visits to supervise the progress of the trainees. These evaluations are prerequisites to assess a student's level of performance during the period of training.

Since the NDT program is conducted entirely in the English medium, students are expected to develop their verbal communication and report writing skills in the English language classes conducted during the first year. This will help them during the Industrial Training period.

SCHEME ADOPTED FOR THE PAYMENT OF BURSARIES

This scheme adopted as per the University Grants Commission Circular No. 11/2018 dated 11th October 2018.

1. Eligibility to apply for Bursaries

Any student shall be eligible to apply for a Bursary if he/she satisfies each of the following conditions.

1.1 The student should be a citizen of Sri Lanka

1.2 He/She should be registered as an internal student for a full time course of study in a University or an Institute affiliated to a University

1.3 Parental Income ceiling

Parental income should be equal to or less than Rs. 500,000/-per annum with effect from the Academic Year 2017/2018 onwards.

1.4 The following concessions to be added to the Income Ceilings specified in 1.3 above

(a) Rs. 24,000/- per school going sister/brother who is under 19 years or under, up to a maximum of three children in a family.

(b) Rs. 36,000/-per child following a course of study in any University or Higher Educational Institution in Sri Lanka, to determine the eligibility of the 2nd child and above condition is that the first child is not in receipt of a Bursary / Mahapola.

1.5 At the time of selection of student for Bursaries, if the parents of the students are separated and there is neither documentary evidence to prove it nor legal action initiated in relation to the said separation, the determination of the income ceiling shall be considered after receiving the Grama Niladhari Report with the police report of the respective Police Division.

- 1.6** If the student is employed his/her income from such employment should be added to the parental income.
- 1.7** If the student is employed and married, the student and the spouse should be considered as a separate family and his/her eligibility for Bursaries will be determined according to the rules and regulations specified in Sections 1.3 and 1.4 in this Circular.

2.

- 2.1** A student who satisfies the eligibility criteria given in section 1.3 above, will be entitled to a Bursary of Rs. 4,000/- per month subject to maximum of 10 instalments per academic year during his/her academic period.
- 2.2** Those students who are eligible to receive Mahapola Scholarship are entitled to receive Rs. 5,000/- per month subject to maximum of 10 instalments per academic year during his/her academic period.

3. Other conditions governing the payment of Bursaries

- 3.1** Any student who provides false or inaccurate statements or who fails to disclose any material fact in his application is liable to have his registration as an internal student cancelled.
- 3.2** Students who have applied for a Bursary or who are in receipt of a Bursary should communicate in writing to the Registrar of the University or to the Director of the Institute in respect of any changes of family income, marital status, employment income etc;
- 3.3** Students who are not in receipt of a Bursary are given an opportunity to apply for a Bursary, if his / her parental income changes due to natural or any other reason/s acceptable to the Registrar of the University or Director of the Institute during his / her academic period.
- 3.4** The Bursaries are paid only during the period of study in the University / Institute. The recipient of a Bursary who for any reason temporarily ceases to follow the course of study or leaves the University / Institute before completion of the course of study should communicate that fact in writing to the Registrar of the University or the Director of the Institute as the case may be.

3.5 The payment of a Bursary to any student may be completely stopped or temporarily suspended for any one or more of the following reasons:

- (i) if the student fails to pass any examination completely, provided however, that the Bursary may be paid to any student who has been referred at the first year examination and who is following the course of study prescribed for the second year.
- (ii) if the student does not pursue his studies diligently
- (iii) if the student conducts himself in an undisciplined manner.
- (iv) for any other valid reason to be decided upon at the discretion of the Vice- Chancellor / Director.

3.6 University authorities will use their discretion on matters relating to the restoration of Bursaries, which have been stopped or temporarily suspended.

3.7 Each eligible student will be paid a maximum of 10 monthly instalments per academic year. Anything over and above 10 instalments will not be paid under any circumstances without prior approval of the UGC.

3.8 Conditions applicable to Mahapola scholarships are also applicable to Bursaries.

3.9 A Student who is in receipt of a Mahapola scholarship will not be eligible to receive a Bursary.

PAYMENTS TO BE MADE BY STUDENTS AT THE ITUM

Fresh Student Registration	Rs. 5000/-
Includes:	
Library & Laboratory Deposit	Rs.2300/-
Registration Fee	Rs.400/-
Inauguration and Orientation Fee	Rs.700/-
Student Hand Book	Rs.1200/-
Document Charges	Rs.400/-
Annual Registration Fee -2 nd Year (semester III and IV)	Rs.400/-
Annual Registration Fee -3 rd Year (semester V and VI)	Rs.400/-
Examination Fees	
Repeat examination fee	Rs. 350/-
Re-scrutiny(Commission Circular No. 978 of 09.04.2012)	Rs. 500/-
Missed course work (practical) fee	Rs. 300/-
Missed continuous assessment fee	Rs. 300/-
Student Identity	
Duplicate Student ID	Rs. 1500/-
Duplicate Student Record Book	Rs. 1500/-
Certificate Fees	
Diploma Certificate	Rs. 2000/-
Transcript	Rs. 2000/-
Additional Transcript	Rs. 1000/-
Certified Copies of Certificates	Rs. 1000/-
Certified Copies of Result Sheets (in addition to first copy)	Rs. 1000/-
Curriculum/ Syllabus	Rs. 2500/-
Award Ceremony Fees	
Supplication	Rs. 4000/-
Cloak fine (Late Returns, per Day)	Rs. 100/-
Lost cloak fee	Rs. 10000/-

Textile and Clothing Technology – Dr. (Mrs.) W.P.S.K.Perera

0112124007 | Ext. 1701 (Office) | 0777603389 (Mobile)

Information Technology – Dr. (Mrs.) Kalpana Galappaththi

0112124009 | Ext. 1139 (Office) | 0714434530 (Mobile)

Training Engineer – Eng. Kamalnath Jinadasa

Ext 1126 (Office) | 0719845375 (Mobile)

Senior Student Counsellor / ITUM – Dr. (Mrs.) Shamain Saparamadu

0716912458 (Mobile)

Professional Counsellor (Visiting) – Mrs. Ayesha Sandagiri

0715475334 (Mobile)

Student Counsellors

**Electrical, Electronics & Telecommunication
Eng. Technology**

Mrs. Tharangika Bambarawanage

Ext 1418 (Office)

0714472765 (Mobile)

Mrs. Sadana Priyanka

Ext 1416 (Office)

0718151392 (Mobile)

Mr. Shiran Madhuranga

Ext 1421 (Office)

0763524732 (Mobile)

Civil Eng. Technology

Mrs. Priyangani Samarasekara

Ext 1223 (Office)

0766038700 (Mobile)

Mr. Sanjaya Maduranga

Ext 1210 (Office)

0711578272 (Mobile)

Ms. Gayanthi John

Ext 1213 (Office)

0771012416 (Mobile)

Chemical & Polymer Eng. Technology

Dr. (Mrs.) Chandani Somaratne

Ext 1612 (Office)

0714433632 (Mobile)

Dr. (Mrs.) Gayani Jayathunga

Ext 1609 / 1601 (Office)

0701697290 (Mobile)

Textile & Clothing Technology

Dr. Ruchira Wijesena

Ext 1707 (Office)

0718603702

Dr. (Mrs.) Srimala Perera

Ext 1706 (Office)

0777603389 (Mobile)

Mechnaical Eng. Tech

Dr. Chandima Kumara

Ext 1515 (Office)

0711562255 (Mobile)

Mr. Asanka Sudarshana

Ext 1506 (Office)

0775014754 (Mobile)

Mr. Chathura Jayasekara

Ext 1505 (Office)

0717130468 (Mobile)

Maritime Studies

Mrs. Dilesha Wijerathne

Ext 1305 (Office)

0773633265 (Mobile)

Information Technology

Dr. (Mrs.) Galappaththi

Ext 1139 (Office)

0714434530 (Mobile)

Mrs. Shashika Ruwanmini

Ext 1140 (Office)
